

Our service is holistic, supporting access to wider support and services beyond education.

We reach learners who wouldn't readily engage with mainstream provision.

## Camden adult community learning: our key messages

We strive to provide excellent teaching and learning and support and to continuously improve quality.

Our service opens up opportunities, broadens horizons and raises aspirations for those most in need.

Our learners feel safe, supported and enjoy learning.

We listen to what our learners and communities say to improve what we do and how and where we do it.

Our learners experience wider outcomes beyond the achievement of new skills:

We develop learners' skills and confidence to learn independently and develop a lifelong learning habit!.

We harness and develop the skills and experience that exist in our communities by supporting volunteer-led learning.

- Improved employability and readiness for work
- Improved health – emotional and physical
- Greater fulfilment in their family life
- New friendships
- More connected to their local community and the outside world
- Improved self-worth through giving back to the community.

We work together to provide impartial information, advice and guidance so that we can help people make an informed decision about their learning.

**Strong partnerships – enable us to do all these things.**

**Learning takes place at the heart of our communities.**
